Work Experience: ۵ Years

Salary Expectation: ۶۰ - ۸۰ Million Tomans

Work Experience

Back-End Developer November ۲۰۲۱ until May ۲۰۲۴ (۲ years and ۶ months)

Realtyna Georgia

- Designed and implemented an administrative dashboard using Laravel and Vue.js to streamline the management of plugins and products.
- Conducted code reviews to maintain code quality and support smooth software releases to production.
- Worked on real estate website projects and gained experience with Multiple Listing Service (MLS) integrations.
- Developed and maintained backend features using PHP and Laravel, working with RESTful APIs and MySQL.
- Used AWS Cognito in projects involving authentication and cloud services.

Back-End Developer September ۲۰۲۰ until September ۲۰۲۱ (۱ year)

ZarSam Iran Tehran

- Developed and refactored RESTful APIs using PHP and Laravel to expand the functionality of the e-commerce platform.
- Developed and improved administrative panel features to streamline backend management workflows and enhance usability.
- Worked with MySQL for data management and Elasticsearch for search-related functionality.
- Contributed to the development and maintenance of the online store's backend and implementation of product requirements.
- Supported ongoing software development with a focus on code quality, maintainability, and improving existing features.

Technologies: PHP, Laravel, RESTful APIs, MySQL, Elasticsearch

Back-End Developer May ۲۰۱۹ until September ۲۰۲۰ (۱ year and ۴ months)

Almas Dade Iran Tehran

- Developed customer club features to support user engagement and satisfaction.
- Contributed to brokerage portal and Sejam system projects within the financial services, stock market, and insurance domains.
- Developed backend features using Laravel and PHP for the company's software projects.
- Worked with CodeIgniter, MySQL, and Vue.js during software development and feature implementation.
- Gained professional experience in backend development, teamwork, and software development practices, progressing from an entry-level developer to more confident work with Laravel.
